Github: github.com/Unnatiy200

LinkedIn: [linkedin.com/in/ml-diary-uy-3293253ab/](https://www.linkedin.com/in/ml-diary-uy-3293253ab/)

TECHNICAL SKILLS

Programming: Python, C++, SQL, JavaScript

ML/AI: TensorFlow, Keras, NLP, Deep Learning, Generative AI

Data Science: Pandas, NumPy, Matplotlib, Scikit-learn

Tools: Git, GitHub, Jupyter, VS Code, Canva

Web: HTML, CSS

EDUCATION

Bachelor of Technology in Computer Science and Engineering

August 2023 – August 2027

Bennett University, Uttar Pradesh

- CGPA: 7.7 / 10
- Relevant Courses: Data Structures, Web Dev, Databases, Software Engineering, Machine Learning & Neural Networks, Generative AI, Natural Language Processing

PROJECTS

AI Recruiter Voice Agent

Python, NLP, TensorFlow, Speech Recognition

- Built an end-to-end AI voice interview system that dynamically generates personalized questions by parsing candidate resumes using NLP
- Integrated real-time speech recognition and sentiment analysis pipeline to evaluate candidate responses and generate instant feedback
- Implemented offline functionality by fine-tuning open-source speech datasets, eliminating dependency on external APIs

Interior AI Design Generator

Python, Stable Diffusion, ControlNet, Generative AI, Prompt Engineering

- Designed and developed a solo GenAI application that generates photorealistic interior design visuals from user prompts using Stable Diffusion
- Integrated ControlNet to preserve spatial structure and layout constraints, enabling precise control over room geometry and object placement in generated outputs
- Built a prompt engineering pipeline to translate natural language design preferences (style, color, mood) into optimized diffusion model inputs
- Reduced design ideation time by automating concept visualization, replacing manual mockups with AI-generated room renders.

CERTIFICATE

Operating Systems and You: Becoming a Power User – Google (Coursera) | Apr 2025

- Completed 27-hour certification with 97.08% score
- Learned OS fundamentals, Linux/Windows CLI, system troubleshooting, and process/memory management

Fundamentals of Network Communication – University of Colorado (Coursera) | Apr 2025

- Completed 15-hour certification with 95.52% score
- Learned networking fundamentals including TCP/IP, routing, switching, and network protocols

Apply Generative Adversarial Networks (GANs) – DeepLearning.AI (Coursera) | Apr 2026

- Applied GANs to real-world use cases including image-to-image translation and data augmentation
- Implemented Pix2Pix and CycleGAN architectures for unpaired and paired image synthesis tasks
